Lyclear Sensitive Treatment

Uses

Overnight treatment for headlice. Kills headlice and their eggs. Dermatologically tested to be gentle to hair and skin. Suitable for use from 6 months.

Dosage

Apply a sufficient quantity of lotion evenly onto dry hair, paying particular attention to the neck and the area behind the ears, covering all of the hair and scalp. Massage well from roots to tips. Leave on overnight (8 hours). Wash the hair the morning after with a normal shampoo and comb the wet hair with the enclosed anti-lice comb to remove dead head lice and eggs.
