

Dermatix

Uses

For the treatment and prevention of keloids and hypertrophic scars such as those resulting from general surgical procedures, trauma wounds and burns. The gel has been shown to flatten, soften and smooth scars, relieve the pain, itching and discomfort of scars as well as reduce any associated redness.

Can be applied to all areas of the skin, including the face, joints and flexures. Dries quickly to form an invisible "sheet".

Dosage

Apply once in the morning and once at night for a minimum period of at least two months.
