Uses

Treatment of mild cases of distal and lateral subungual onychomycoses caused by dermatophytes, yeasts and moulds limited up to 2 nails.

Format and Ingredients

Nail lacquer containing:

Amorolfine 5% w/v,

Dosage

18 years and over: apply to the affected nail(s) once weekly. Remains effective under cosmetic nail polish, which can be applied at least 10 minutes after application of Curanail. Treatment duration depends on intensity and locality of infection, but fingernails usually require 6 months and toenails 9-12 months. A review of treatment is recommended at intervals of approximately 3 months.
