

Corsodyl Mint Mouthwash

Uses

For inhibition of the formation of dental plaque and an aid in the treatment and prevention of gingivitis and in the maintenance of oral hygiene, particularly in situations where tooth brushing cannot be adequately employed (e.g. following oral surgery and in disabled patients). Also for use in post-periodontal surgery or treatment regimens to promote gingival healing. Useful in the management of aphthous ulceration and oral candidal infections (e.g. denture stomatitis and thrush).

Dosage

Adults, the elderly and children over 12: thoroughly rinse the mouth for about 1 minute with 10ml twice daily. For gingivitis, use for 1 month. For ulcers and candidal infections, use for 48 hours after the infection has cleared. Children under 12 years: should not use unless recommended by a healthcare professional.
