

## Fybogel Hi-Fibre Orange

### Uses

For patients requiring a high fibre regimen: for example, for the relief of constipation, including constipation in pregnancy and the maintenance of regularity. Also for the management of bowel function in patients with haemorrhoids.

### Dosage

Over 12 years: contents of 1 sachet stirred into a glass of water morning and evening after meals. Children 6-12 years: half to 1 level 5ml spoonful stirred into water, depending on size and age, morning and evening. Children under 6 years: not recommended. Should be taken as soon as possible after mixing the granules.

### Format and Ingredients

Sachet of orange flavoured granules containing:  
Ispaghula Husk 3.5g,
