

# Dioralyte Sachets

## Uses

Oral correction of fluid and electrolyte loss in infants, children and adults and in the treatment of diarrhoea.

## Dosage

Adults: contents of 1 or 2 sachets after every loose motion.  
Children: 1 sachet after every loose motion. Infants up to the age of 2: one to one and a half times the usual 24 hour feed volume of Dioralyte Solution under medical supervision.  
Dissolve contents of 1 sachet in 200ml of drinking water. For infants, and when drinking water is unavailable use freshly boiled then cooled water. Available in blackcurrant, citrus and natural flavour.

## Format and Ingredients

Powder for oral solution containing:  
Glucose 3.56g, Sodium Chloride 0.47g, Potassium Chloride 0.3g, Disodium Hydrogen Citrate 0.53g,
