

Derma Care Eczema Treatment Cream

Uses

Cream for symptomatic treatment and relief of skin redness and itching associated with mild to moderate atopic eczema. Suitable for adults and children from 1 month. Suitable for long-term treatment. Dermatologically tested. Free from fragrances, colours, parabens, mineral oils and preservatives.

Dosage

Apply twice daily or as often as needed. Gently massage cream onto affected areas of the skin. Do not use on infected skin. Discontinue use if allergic reaction occurs.
