

Rennie Liquid Heartburn Relief Oral Suspension

Uses

Alleviates the painful conditions resulting from the reflux of gastric acid and bile into the oesophagus by suppressing the reflux itself. Indicated in heartburn, including heartburn of pregnancy, dyspepsia associated with gastric reflux, hiatus hernia, reflux oesophagitis, regurgitation and all cases of epigastric and retrosternal distress where the underlying cause is gastric reflux.

Dosage

Over 12 years: 2-4 5ml spoonfuls. Under 12 years: not recommended. Doses should be taken after meals and at bedtime up to 4 times a day. Not to be taken within two hours of taking other medicines by mouth.
