

Nicotinell Mint 1mg and 2mg Lozenge

Uses

Relief of nicotine withdrawal symptoms in nicotine dependency as an aid to smoking cessation.

Dosage

Users should stop smoking completely during treatment. The 1mg lozenge is for smokers of less than 20 cigarettes a day. The 2mg lozenge is for smokers of over 30 cigarettes a day. For those smoking between 20-30 cigarettes a day either the 1mg or 2mg lozenge may be used depending on personal preferences and characteristics. 18 years and over: 1 lozenge to be sucked when the urge to smoke is felt following the sucking technique on the pack. Initially 1 lozenge to be taken every 1-2 hours. The usual dosage is 8-12 lozenges per day. Maximum 24 lozenges in 24 hours. Do not exceed one lozenge per hour
