Inhalation cartridge containing:

Nicotine 15mg,

## Dosage

12 years and over: Use whenever the urge to smoke is felt or to prevent cravings. Maximum dose: 6 cartridges per day. Smoking cessation: Replace all cigarettes with the inhalator, then reduce the number of inhalators used until stopped completely. Cutting down prior to quitting: Use the inhalator as needed between smoking episodes to prolong smoke-free intervals as much as possible before stopping smoking completely. Those who have quit smoking but are having difficulty discontinuing the inhalator should speak to a pharmacist or doctor for advice.
