

Canesten Thrush External Cream

Uses

Treats the external symptoms of thrush, such as itching, burning, redness and soreness. Should be used as an adjunct to internal treatment. Can also be used to treat a sexual partner's penis to prevent re-infection.

Dosage

16-60 years: apply thinly 2 or 3 times daily. Treatment should be continued for up to 1 week after treating the internal infection in women and for up to 2 weeks in men. If symptoms worsen or do not improve within 7 days, a doctor should be consulted. Under 16 or over 60 years: a doctor should be consulted.

Format and Ingredients

Cream containing:
Clotrimazole 2% w/w,
