

Curanail 5%w/v Medicated Nail Lacquer

Uses

For the treatment of mild cases of fungal nail infection where one or two nails are affected and the infection is in the upper half and/or sides of the nail.

Dosage

18 years and over: apply to the affected nail(s) once weekly. Cosmetic nail lacquer may be applied at least 10 min after application. Treatment duration depends on intensity and locality of infection, but fingernails usually require 6 months and toenails 9-12 months. A review of treatment is recommended at intervals of approximately 3 months.
