

Canesten Thrush Duo Oral Capsule & External Cream

Uses

Complete treatment for vaginal thrush to treat both the internal cause and external symptoms. The capsule can also be used to treat candidal balanitis associated with vaginal thrush. The cream can also be used for treatment of the sexual partner's penis to prevent re-infection. Do not use if pregnant or breastfeeding or if taking terfenadine, cisapride, astemizole, pimozone, quinidine and erythromycin.

Dosage

16-60 years: Take the capsule with a glass of water. Apply cream thinly 2 or 3 times daily. If symptoms worsen or do not improve within 7 days, a doctor should be consulted. Under 16 or over 60: a doctor should be consulted.

Format and Ingredients

Oral capsule and tube of external cream containing:
Capsule: Fluconazole 150mg, External Cream: Clotrimazole 2% w/w,
