

Blistex Cold Sore Cream

Uses

Treatment of early stages of cold sores. Treatment must begin as soon as possible after the first cold sore symptoms or signs appear.

Dosage

Adults and adolescents over 12 years: at the first sign of a cold sore, apply to the affected area 5 times a day, at approximately 3-hourly intervals until healed, for a maximum of 10 days. Do not start treatment with the cream at the stage of an already developed blister or ulcer.
