## Uses

Helps ease the problem of constipation by softening hardened stools.

## Format and Ingredients

Single use 5ml tube containing:  
  
Sodium Citrate Dihydrate 450mg, Sodium Laurylsulfate 75mg,

## Dosage

Remove nozzle and squeeze out a drop of fluid to lubricate the nozzle tip. Insert nozzle fully into the back passage (rectum). (Children under 3 years: insert only half the length of the nozzle.) Squeeze out the contents fully and then withdraw the nozzle, still squeezing the tube lightly.
