## Uses

For the treatment of mild cases of distal and lateral subungual onychomycoses caused by dermatophytes, yeasts and moulds, limited up to two nails.

## Format and Ingredients

Nail lacquer containing:

Amorolfine 5% w/v,

## Dosage

Adults: apply to the affected nail(s) once weekly. Treatment duration depends on intensity and locality of infection, but fingernails usually require 6 months and toenails 9-12 months. A review of treatment is recommended at intervals of approximately 3 months.
